Standard 4 - Tobacco Cessation Treatment

Inpatient smoking cessation treatment

- CBT-based smoking cessation treatment
- All inpatients are systemically referred to the free smoking cessation service at the hospital – lecture for all inpatients “tobacco and nicotine”
- Group treatment once a week, possibility for medication, NRT, acupuncture, individual treatment, ...
- 2018 about 90 inpatients were in the smoking cessation groups

Outpatient smoking cessation treatment (see figure)

- Regional smoking cessation program for population of the federal state Vorarlberg – cooperation with regional health insurance and regional state government
- Since 2013 about 1.200 first consultations, 47 smoking cessation groups, 240 individual treatments, 212 acupuncture treatments, 63 inpatient smoking cessation
- Quit rate (intention-to-treat) 2016:
 - Individual treatment: 30,4%
 - Group treatment: 36,7%
 - Inpatient smoking cessation (3 weeks): 37,5%

Standard 7 – Community Engagement and Cooperations

Engagement

- Within the Foundation Maria Ebene
- Other healthcare services (regional hospitals, health insurances, national addiction-hospitals, ...)
- Several press articles in regional media
- Interviews in press or on TV
- Press conferences (see picture – with the regional minister of health)
- Information and support for the petition “don’t smoke” – smoke free gastronomy
- Action at the “World No Tobacco Day”

Cooperations

- SUPRO – regional center for prevention of addictions
- Lectures and smoking cessation programs for regional companies or hospitals
- Consultation service for inpatients from the hospital in Hohenems
- National Quitline “Rauchfrei Telefon” (<http://www.rauchfrei.at>)
- Austrian Network Meetings for Smoking Cessation Experts
- ...
